

INDEX TO VOL. XV.

- ABBOTT.** A method of studying the action of the muscles of the hind leg of the frog, xxxii.
- Adrenalin**, effect on blood-vessels of brain, method of studying, xxxii.
- Alkalinity**, blood, 30.
- Amœbæ**, movements, xvi.
- Anesthetics**, pharmacological study, 85.
- Anions**, antitoxic action, xiii.
- Antibodies** produced by injection of nucleo-proteids, xxxi.
- Antipyretic**, camphenal, xxvi, 433.
- Antitoxic** action of salts, xiii.
- Apparatus**, xxx, xxxi, xxxii.
- for varnishing, xxx.
- AUER, J.** See MELTZER and AUER, xxxi, 387.
- BEACH, F. E.** A determination of the errors of eccentricity and collimation in the human eye, 295.
- BEEBE, S. P.** Antibodies produced by the injection of nucleo-proteids, xxxi.
- Blood**, alkalinity, 30.
- Blood pressures**, lateral, 244.
- BROWN, E. D.** See SOLLMANN, 121.
- BROWN, O. H.** A pharmacological study of anesthetics and narcotics, 85.
- BROWN, O. H.** A colloidal compound of strychnine, and its pharmacology, xxii.
- BROWN, O. H.** The comparative toxicity for paramœcia of the salts of strychnine, of morphine, and of quinine, xxiv.
- BUSCH, F. C.** Suprarenal transplantation, xxxi.
- BUSCH, F. C.**, and **C. VAN BERGEN.** Suprarenal transplantation with preservation of function, 444.
- CAMPHENAL** as an antipyretic, xxvi, 433.
- CANNON, W. B.**, and **F. T. MURPHY.** The movements of the stomach and intestine in some surgical conditions, xxv.
- CANNON, W. B.** Further observations on the mechanism of the pylorus, xxv.
- Carbon dioxide**, apparatus for quantitative determination, xxxi.
- CARLSON, A. J.** On the mechanism of co-ordination and conduction in the heart, with special reference to the heart of *Limulus*, xxxi, 99.
- CARLSON, A. J.** Comparative physiology of the invertebrate heart. IV.—The physiology of the cardiac nerves in the arthropods, 127.
- CARLSON, A. J.** Further evidence of the direct relation between the rate of conduction in a motor nerve and the rapidity of contraction in the muscle, 136.
- CARLSON, A. J.** Temperature and heart activity, with special reference to the heat standstill of the heart, 207.
- CARLSON, A. J.** Osmotic pressure and heart activity, xxxi, 357.
- Catalysis**, 148, 412.
- Cell division**, 46.
- Centrifugalizing** *Arbacia* eggs, xxi.
- Chlorides** in animal and vegetable cells, xxxi.
- in nerve axon, xxxi.
- CLOSSON, O. E.** See UNDERHILL and CLOSSON, xx, 321.
- Colloidal strychnine**, xxii.
- Colloids**, xii, 46.
- Ctenophore**, coagulation of colloids in swimming-plate, related to contractility, xii.
- Curare**, effect on muscle in yield of carbon dioxide, xxviii.
- DAWSON, P. M.** The lateral blood "pressures" at different points of the arterial tree, 244.
- Degeneration** in nerve tissue, 272.
- DELLINGER, A. P.** Movements of amœbæ and allied forms, xvi.
- Diet**, relation to secretion, 406.
- Digestion**, elasmobranchs, 42.

- E**LASMOBRANCHS, digestive tract, 42.
 Enzymes, ^{xiii}, 148.
 Equilibrium in solutions of phosphates, 257.
 Ergot, production of peristalsis, xxxi.
ERLANGER, J. Demonstration of heart-block in the dog, xxxi.
ERLANGER, J., and A. D. HIRSCHFELDER. Further studies on the physiology of heart-block in mammals, 153.
 Eye, human, errors of eccentricity and colimation, 295.
- F**ISHER, I. A new method for indicating food values, 417.
FISHER, L. A demonstration of apparatus, xxxii.
- G**ALVANOTROPISM of Volvox, 235, xxxi.]
GIES, W. J. See HOUSE and GIES, xix.
GIES, W. J. See RUSSELL and GIES, xxiii.
GILBERT, R. D. See OSBORNE and GILBERT, 333.
 Glutamic acid, proportion yielded by proteins, 333.
 Glycosuria, salt, mechanism, xx, 321.
GOODSON, W. H. See KOCH and GOODSON, 272.
 Growth, law of, xvii.
- H**AIR, human, [comparative chemical composition, xxxi.
HATAI, S. Further investigations on the effect of partial starvation on the central nervous system of the white rat, xxxi.
HATCHER, R. A. The action of saline solutions on the vitality of blood vessels, 144.
HAWK, P. B., and T. A. RUTHERFORD. The comparative chemical composition of the hair of different races, xxxi.
HAYHURST, E. R. See KEMP and HAYHURST, xxviii.
HAYHURST, E. R. See KEMP, STANLEY and HAYHURST, xxxi.
 Heart, activity influenced by temperature, 207, xxxi.
 —, activity and osmotic pressure, xxxi, 357.
 —, block, xxxi, 153.
 —, conduction, i, 99.
 —, ganglion affected by absence of oxygen, xxxi.
 —, heat standstill, 207.
 Heart, inhibition, xiv, 280.
 —, nerves, 127.
 —, oxygen absorption and consumption, 303.
 —, perfusion with oil, 121.
 —, refractory period, 8.
 —, respiration, 371.
 —, tonus, i.
 —, vagus inhibition, xiv, 280.
HENDERSON, L. J. Equilibrium in solutions of phosphates, 257.
HENDERSON, Y. The cause and phenomena of surgical shock, xviii, xxxi.
HIRSCHFELDER, A. D. See **ERLANGER** and **HIRSCHFELDER**, 153.
HODGE, C. F. Sleep of infants, xxxi.
HOUGHTON, E. M. An improved apparatus for recording the secretion of urine, xxxii.
HOUGHTON, E. M. A study of para-aethoxy-phenyl-camphoryl-imid(camphenal) as an antipyretic, xxvi, 433.
HOUSE, H. D., and W. J. GIES. The influence of aluminium ions on lupin seedlings, xix.
HOWELL, W. H. The relation of cardiac inhibition to the inorganic constituents of the blood, xiv.
HOWELL, W. H. Vagus inhibition of the heart in its relation to the inorganic salts of the blood, 280.
HUBER, G. C. Models of the kidney tubules, xxxii.
HYDE, IDA H. A reflex respiratory centre, xi.
 Hypertonicity, influence on heart rhythm, 358.
 Hypotonicity, influence on heart rhythm, 366.
- I**NTESTINE, movements, xxv.
 Intravenous injections of magnesium salts, 387.
 Ions, action on growth, xix.
 —, antitoxic, xiii.
- K**EMP, G. T., and E. R. HAYHURST. Observations on the survival-respiration of curarized and non-curarized muscle, xxviii.
KEMP, G. T., O. O. STANLEY, and E. R. HAYHURST. A new apparatus for the quantitative determination of small amounts of carbon dioxide, xxxi.
 Kidney, dog, perfusion, 147.
 —, tubules, models of, xxxii.

- KOCH, W. Relation of kreatinin excretion to variations in diet, 15.
- KOCH, W. A study of the metabolism of the nervous system, xv.
- KOCH, W., and W. H. GOODSON. A preliminary study of the chemistry of nerve tissue degeneration, 272.
- Kreatinin, relation of excretion to diet, 15.
- LAWRENCE, C. H., Jr. See PORTER, LAWRENCE, and NEWBURGH, xxix.
- LILLIE, R. S. On the relation of the coagulation of the colloids of the ctenophore swimming-plate to its contractility, xii.
- LILLIE, R. S. The "antitoxic" influence of certain anions on the action of solutions of alkaline earth chlorides on ciliated cells, xliii.
- LILLIE, R. S. The physiology of cell-division. — I. Experiments on the conditions determining the distribution of chromatic matter in mitosis, 46.
- LEE, F. S. Some of the chemical phenomena of muscle fatigue, xxxi.
- Limulus heart, xi, 99, 207, 357, 371.
- Lipase, action of, xxvii.
- LOEVENHART, A. S. Further observations on the action of lipase, xxvii.
- LOMBARD, W. P. Demonstration of the effect of excitation of the vagus nerve on the pulse curve obtained from the longitudinal expansion of the carotid, xxxi.
- LOMBARD, W. P. An exhibition of apparatus, xxxii.
- LUSK, G. A law of growth reiterated, xvii.
- LYON, E. P. A handy varnishing apparatus, xxx.
- LYON, E. P. Some results of centrifugalizing the eggs of *Arbacia*, xxi.
- MACALLUM, A. B. On the occurrence of chlorides in animal and vegetable cells, xxxi.
- MACALLUM, A. B. On the occurrence of chlorides in the nerve axon, xxxi.
- Magnesium salts, physiological and pharmacological studies, 387.
- MARTIN, E. G. A study of the absorption and consumption of oxygen in heart tissue, 303.
- MATHEWS, A. P. Pharmacological action of metals at a distance, xxxi.
- MATHEWS, A. P., and H. MCGUIGAN. The oxidation of sugar by copper acetate, xxxi.
- MCGUIGAN, H. See MATHEWS and MCGUIGAN, xxxi.
- MELTZER, S. J., and J. AUER. Physiological and pharmacological studies of magnesium salts. II. — The toxicity of intravenous injections; in particular the effects upon the centres of the medulla oblongata, 387.
- MELTZER, S. J., and J. AUER. The production of gastro-intestinal peristalsis by ergot and its inhibition by magnesium sulphate, xxxi.
- MENDEL, L. B. The alimentary enzymes of the embryo, xiii.
- MENDEL, L. B. A demonstration of apparatus, xxxii.
- Metabolism of nervous system, xv.
- Metals, pharmacological action at a distance, xxxi.
- MILLS, W. The hemisection of the spinal cord, xxxi.
- Mitosis, 46.
- Morphine, toxicity, xxiv.
- Mucous membrane, nasal, composition, xxxii.
- MURPHY, F. T. See CANNON and MURPHY, xxv.
- Muscle, contraction, rapidity, 136.
- , fatigue, chemical phenomena, xxxi.
- , heart, tonus, 1.
- , respiration, xxviii.
- , tetanus, 10.
- Muscles, frog's hind leg, method of studying action, xxxii.
- NARCOTICS, pharmacological study, 85.
- NEILSON, C. H. Further evidence of the similarity between catalysis and enzyme action, 148.
- NEILSON, C. H. The inversion of starch by platinum black, 412.
- NEILSON, C. H., and O. P. TERRY. The adaptation of the salivary secretion to diet, 406.
- Nerve, conduction, 136.
- , degeneration, 272.
- Nerves, cardiac, 127, 280.
- Nervous system, metabolism, xv.
- , starvation, xxxi.
- NEWBURGH, L. H. See PORTER, LAWRENCE, and NEWBURGH, xxix.
- NEWMAN, H. H. On the respiration of the heart, with special reference to the heart of *Limulus*, 371.

- NEWMAN, H. H. The activity of the heart ganglion in the absence of oxygen, xxxi.
- Nucleo-proteids, antibodies produced by injection, xxxi.
- OSBORNE, T. B., and R. D. GILBERT. The proportion of glutaminic acid yielded by various vegetable proteids when decomposed by boiling with hydrochloric acid, 333.
- Osmotic pressure and heart activity, xxxi, 357.
- Oxidation of sugar, xxxi.
- Oxygen, absorption and consumption in heart tissue, 303.
- , lack of, 30, xxxi.
- PACKARD, W. H. On resistance to lack of oxygen and on a method of increasing this resistance, 30.
- Peptone, xii.
- PORTER, W. T. Studies in the physiology of muscle. I. Observations on the tonus of heart muscle, i.
- PORTER, W. T., C. H. LAWRENCE, JR., and L. H. NEWBURGH. The relation of tonus contraction to conduction in smooth muscle, xxix.
- Proceedings of the American Physiological Society, xi.
- Pylorus, mechanism, xxv.
- QUININE, toxicity, xxiv.
- RESPIRATORY centre, xi.
- RUSSELL, B., and W. J. GIES. On the composition of nasal mucous membrane, xxiii.
- RUTHERFORD, T. A. See HAWK and RUTHERFORD, xxxi.
- SALINE solutions, action on vitality of blood vessels, 144.
- Salivary secretion, adaptation to diet, 406.
- Shock, xxxi.
- Sleep, infants, xxxi.
- SOLLMANN, T. The revival of the excised mammalian heart by perfusion with oil, 121.
- Spinal cord, hemisection, xxxi.
- STANLEY, O. O. See KEMP, STANLEY, and HAYHURST, xxxi.
- Starch, inversion by platinum black, 412.
- Starvation, nervous system, xxxi.
- STEWART, G. N. The resuscitation of the central nervous system, xxxi.
- Stomach, movements in surgical conditions, xxv.
- STOOKEY, L. B. Concerning peptone, xii.
- Strychnine, colloidal compound, xxii.
- , morphine, quinine, comparative toxicity, xxiv.
- SULLIVAN, M. X. The physiology of the digestive tract of elasmobranchs, 42.
- Suprarenal transplantation, xxxi, 444.
- TERRY, O. P. Galvanotropism of volvox, xxxi, 235.
- TERRY, O. P. See NEILSON and TERRY, 406.
- Tonus, relation to conduction in smooth muscle, xxix.
- , heart muscle, i.
- Transplantation, suprarenal, 444.
- UNDERHILL, F. P., and O. E. CLOSSON. The mechanism of salt glycosuria, xx, 321.
- Urine, apparatus for recording secretion, xxxii.
- VAGUS, inhibition, related to inorganic salts of the blood, xiv, 280.
- , effect of excitation on carotid pulse curve, xxxi.
- VAN BERGEN, C. See BUSCH and VAN BERGEN, 444.
- WIGGERS, C. J. A method of studying the action of adrenalin, etc., on the blood vessels of the isolated brain, xxxii.
- WILLIAMS, W. W. See SOLLMANN, 121.
